EDISPHERE - EDI Integration Suite

In today's very competitive and global economy, large customers are demanding integrated supply chains in order to reduce transaction cost and increase operational efficiency. Every member of the trading community must integrate else they risk losing business. But high cost and complexity of implementing supply chain integration technologies continues to be a major barrier. The problem becomes more severe in global supply chains operating in different time zones.

EDISPHERE - EDI Integration suite is a complete and proven supply chain integration platform with customers in USA, UK, Singapore, Hong Kong and South Africa. EDISPHERE seamlessly integrates your entire supply chain using a variety of electronic data interchange (EDI) formats such as X12, EDIFACT, XML, SAP IDOCs and proprietary formats. New partners and business messages can be added very quickly and robustly. EDISPHERE is the most cost-effective and high-performing 24x7 supply-chain integration solution for your business.

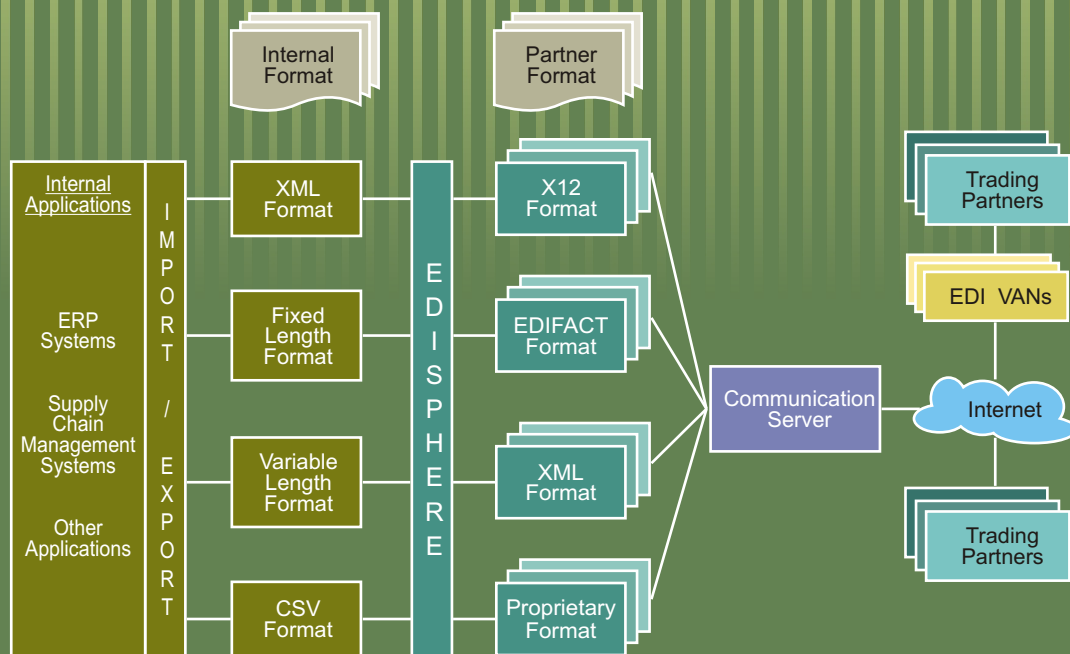

APPLICATION INTEGRATION

Customer Speaks...

EDISPHERE IN PORTS

"The design of the EDISPHERE system and infrastructure has provided us with a very robust, reliable and highly available system that allows us to confidently own and maintain the system in our 7x24 environment. The support we received with the product has elevated our implementation from a success to an extraordinary success" says **Mark Manuel**, Sr. Director - I.T. Operations at Ports America, the largest terminal operator in USA (www.portsamerica.com)

EDISPHERE seamlessly integrates Ports America internal applications with major shipping lines across several ports transacting over 250,000 EDI transactions per month in different data formats (X12, EDIFACT, XML, Proprietary).

EDISPHERE IN LOGISTICS

"I am very pleased with the reusability of EDISPHERE mappings, which greatly enhances the implementation speed of our own clients. I am also very pleased with it's stability, reliability and it's performance has been excellent", says **Tom Bowditch**, Chief Technology Officer at Transite Technologies in USA. "EDISPHERE allows us to implement customized transactions in less time than any other system" says **Geoff Comrie**, CEO of Transite (www.transite.com).

EDISPHERE enables Transite's very demanding transportation clearing house operation consisting of status messages, bill of lading, invoices from shippers, carriers and intermediaries in different formats (X12, XML, CSV, others)

Meets your EDI requirements

- Entirely
- Reliably
- Cost effectively
